Government Tender Profile

Delivering Durable Public Infrastructure

Company Overview

L&A INFRAZ DEVELOPERS is a civil and infrastructure contracting company specializing in bridge construction, road development, and public building projects. The company executes government and institutional works with structured planning, disciplined site management, and strict quality compliance.

With hands-on leadership involvement and operational control at site level,
INFRAZ focuses on timely completion, cost discipline, structural integrity, and engineering precision.

Core Areas of Expertise:

- Major and minor span bridges
- RCC girder bridges and slab bridges
- Box, pipe and slab culverts
- Road construction and rehabilitation
- Public buildings including schools and institutional structures

Vision, Mission & Core Strength

Vision:
To deliver durable infrastructure that enhances public connectivity and supports regional development.

Mission:
Execute bridge and infrastructure projects with engineering precision and uncompromised quality. Ensure time-bound delivery while maintaining strict safety and compliance standards.

Core Strengths:

- Structured labour deployment (skilled and unskilled)
- Material control and procurement discipline
- Strong site supervision and documentation
- Compliance-driven execution model

Bridge Project Capabilities

Substructure Works:

- Pile foundation (cast-in-situ bored piles)
- Pile caps, abutments, piers and wing walls
- Open and raft foundations

Superstructure Works:

- RCC girder casting and erection
- Deck slab concreting and reinforcement
- Expansion joints and bearings installation
- Crash barriers and parapet walls

Ancillary & Protection Works:

- Approach roads and embankment formation
- Reinforced earth structures
- River training and scour protection works

Road & Building Construction Capability

Road Infrastructure:

- WBM, GSB, and Bituminous works
- Drainage and side protection structures

Building Works:

- School buildings and institutional structures
- Government facilities
- Structural RCC works and finishing

Execution Methodology & Quality Control

Pre-Execution:

- Technical drawing review and BOQ validation
- Resource mobilization and cash flow planning

Site Execution:

- Daily progress monitoring
- Stage-wise shuttering, reinforcement, and concreting checks

Quality Assurance:

- Cube testing and material testing as per specifications
- Measurement book coordination and compliance reporting

Safety Management:

- Toolbox meetings and risk assessments
- Mandatory PPE compliance

Resources & Organizational Strength

Technical Team:

- General Manager, Project Manager, Construction Manager and Site Engineers
- QA/QC personnel
- Procurement and Stores team
- Safety Supervisor

Machinery & Equipment:

- Excavators and loaders
- Concrete mixers and vibrators
- Compactors and shuttering systems
- Transport vehicles
